

MD ASHIQUR RAHMAN

Software Engineer — Backend & Full-Stack Web Applications

Pirgacha, Rangpur, Dhaka, Bangladesh | +880 1609087059 | mdrahmanashiqu3@gmail.com | linkedin.com/in/kazi-ashiquurrahman | github.com/kaziashiqu3

PROFESSIONAL SUMMARY

Software Engineer with 5.5+ years of experience designing and building production web systems in PHP and Laravel, spanning SaaS, e-commerce, booking, and fintech domains. Delivered 20+ full-stack applications and REST APIs, including multi-tenant SaaS architectures, real-time interfaces with Laravel Livewire, and integrations with 4-6 payment gateways. Comfortable owning a system end-to-end — from database design through deployment — and has mentored junior developers within a small team.

Core strength is in PHP/Laravel backend architecture, but works comfortably across JavaScript, Node.js, and React on the frontend, and adapts quickly to new stacks and AI-assisted development workflows when a project calls for it.

CORE SKILLS

Languages & Frameworks: PHP, Laravel, Laravel Livewire, JavaScript, Node.js, React.js, jQuery

Data: MySQL, Database Design, Query Optimization

APIs & Architecture: RESTful API Design & Integration, Multi-Tenant SaaS Architecture, System Design

Domain Systems: Payment Gateway Integration, E-Commerce Platforms, Booking & Reservation Systems

DevOps & Tooling: Docker, Git, Code Review, Debugging & Performance Optimization, Technical Documentation

Leadership: Junior Developer Mentoring, Requirements Analysis, Client-Facing Project Coordination

PROFESSIONAL EXPERIENCE

Software Developer (PHP – Laravel)

January 2021 – Present

TheSoftKing Ltd — Bangladesh

- Delivered 20+ production Laravel applications and REST APIs across SaaS, e-commerce, booking, and fintech domains, owning each system from database design through deployment.
- Designed and built multi-tenant SaaS architectures supporting multiple isolated client instances from a shared codebase, reducing duplicate maintenance effort.
- Integrated 4-6 payment gateways and third-party services to support secure, scalable transaction flows for e-commerce and booking platforms.
- Implemented Laravel Livewire across client projects to add real-time, dynamic UI features without full page reloads, improving perceived performance.
- Mentored junior developers and led small feature teams, reviewing code and setting implementation approach on client projects.
- Took ownership of customization and enhancement work on live, in-production client systems, balancing new feature delivery with system stability.

Junior Software Developer (PHP – Laravel)

March 2019 – December 2020

Deshi System Limited — Bangladesh

- Developed and maintained PHP/Laravel web applications, contributing backend features, database schema changes, and bug fixes.
- Built a working foundation in Laravel architecture, MySQL database design, and collaborative development workflows (Git, code review).

SELECTED SYSTEMS DELIVERED

Representative production systems built and maintained as part of core development work (client/product names withheld for confidentiality):

Multi-Tenant Hotel Management SaaS

Reservations, dynamic room assignment, role-based staff access, POS/food management, and booking analytics for multiple hotel operators on a shared platform.

Bus Ticketing & Fleet Booking Platform

End-to-end ticketing system handling routes, schedules, fleets, and seat booking, integrated with 30+ automated payment gateways.

Microstock Marketplace

Photo-sharing marketplace with contributor, reviewer, and admin roles, subscription plans, and automated payouts.

Matchmaking & Matrimony Platform

Member profile system with compatibility-based search, profile verification, and secure in-app messaging.

E-Commerce Storefront & Admin Suite

Full-featured catalog, cart, order, and store-management system, later adapted into a dedicated children's-products storefront.

International eSIM Purchase Platform

Cross-platform application and REST API layer for browsing, purchasing, and managing international eSIM data plans.

Multi-Vendor Hotel Booking SaaS

Vendor and admin panels with merged bookings, staff roles, discounting logic, and a dedicated REST API layer.

Video Sharing & Streaming Platform

Platform enabling users to upload videos and stream them on demand, with a browsable content library and playback delivery layer.

EDUCATION

B.Sc. in Computer Science & Engineering

Bangladesh Institute of Science & Technology (BIST), Dhaka — CGPA 3.34/4.00 — 2020

Higher Secondary Certificate (Science), Rangpur Govt. College — CGPA 4.57/5.00 — 2015

Secondary School Certificate (Science), Kallani High School — CGPA 5.00/5.00 — 2013

LANGUAGES

Bangla — Native / Fluent English — Professional Working Proficiency

ADDITIONAL INFORMATION

- Seeking: Full-time Software Engineer role (mid-to-senior level)
- Preferred Locations: Dhaka, Bangladesh; open to relocation to Australia, Canada, India, UK, or US
